- Automated & Remote Lighting Controls •
- Automated Motorised Curtains and Blinds •
- Multi-room Audio Distribution System •
- Integrated Automated Security System & CCTV view on iPad •
- Retro-fit AV and Automation Systems with no hacking •

Lighting Control Systems

Switch on or off lights with a remote and adjust to the ideal level of lighting to your delight!

Control the lights from anywhere

Switch off lights without getting out of your seat or bed.

Program the lights to turn on or off at specific times

Don't worry about an empty un-lighted house just because you are not home. One button tap to switch off all the lights when you leave the house.

Set Light Scenes with 1 button

You can program a lighting design consistent with a relaxing evening, a late night party or a holiday dinner. Change the lighting scenes at the touch of a button or a tap on a touch-screen, remote or keypad.

Motion Sensors

Walk-in wardrobes and entrance hallways are great places to have sensors which turn lights on simply with your presence.

Energy Efficiency

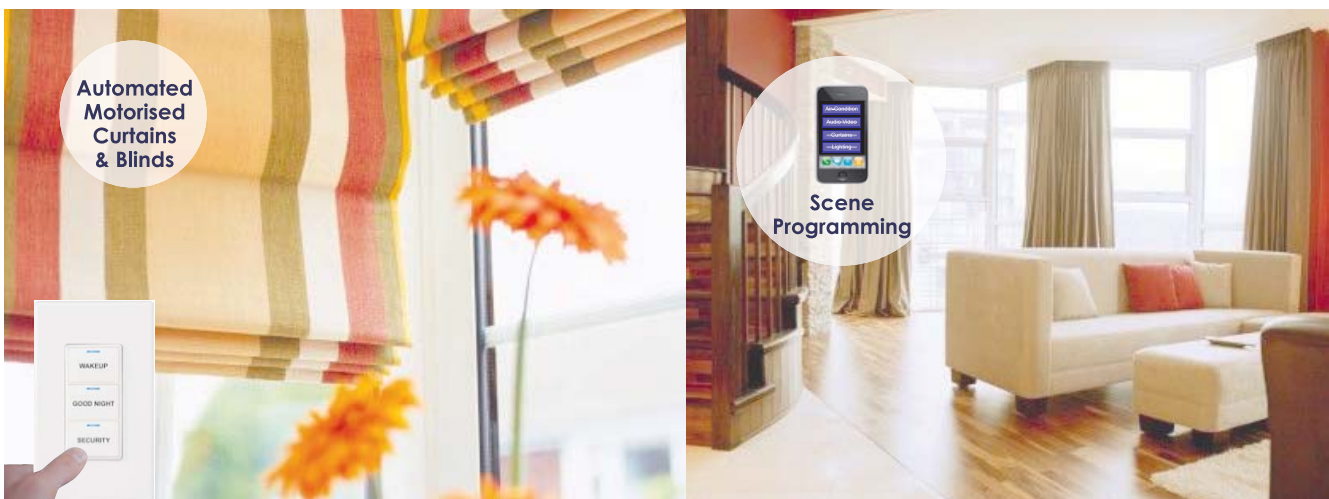

Light control systems save you money by increasing your energy efficiency and turning off lights when not in used.

Security

Lighting control systems can be programmed to turn on your lights when someone trespass your home.

Motorized Blinds and Curtain Systems

Control drapes, curtains and blinds with a remote.

Program the Blinds and Curtains

Curtains can draw automatically in the morning to wake you up gently to the sunrise! Or if you would like to sleep with the night sky but doesn't want to be woken up by the morning sun, just program them to draw in the middle of the night, automatically!

Ideal level of lighting

A blind or curtain control system can be programmed to provide the ideal level of lighting and heat, at any given time and occasion. You may even draw the curtains via the internet with your iphone/ipad!

Automation Systems via Remotes, Touch Screens or iPhones

Consolidate all the remotes to an iPad or iPhone. Control music, TV, lights, aircon and security system simply and affordably from anywhere in your home via remotes and touch screens, and anywhere in the world via internet and mobile phones. Forgetting to switch off the home lights when you're on vacation will be a thing of the past.

Controllable Home Devices

- . Lightings . Air-con
- . TV, DVD & Home theatre . CCTV
- . Motorised Curtains
- . Remote Control Fans
- . Alarm System

Multi-room Audio Distribution

With an audio/video whole house distribution system, your full collection of music can be centralized and shared with every family member. Be it at the garden, balcony or even rooftop!

Multi-room audio distribution with speakers in the ceilings eliminates the clutter of audio equipment in the room

Simplify Your Music System

Access your entire movie and music collection in any room from a single source. No more Hi-fi systems in each room. Select your choice of music/movies/radio stations anywhere in your home on the iPad or touchscreen. Zero clutter, 100% enjoyment!

Multiple Sources from a Single System

With a whole-house A/V distribution system, the children can listen to their favourite singers in their rooms, the mom listens to her favourite radio station all at the same time from 1 system!

Serves Multiple Areas

Enjoy music in patios, gardens and pool areas with weather-proof speakers that match the landscape.

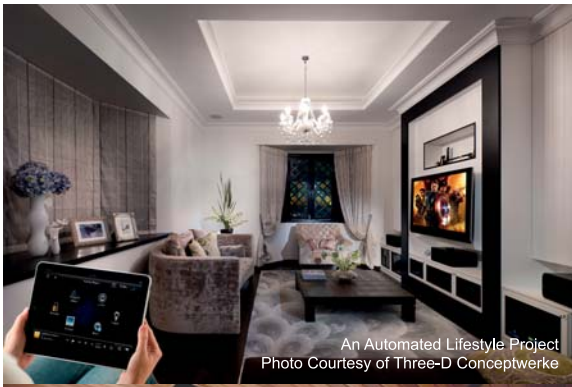

Integrated IP CCTV & Security System view via iPad

You will feel safe when you can view your home via iPad realtime remotely. An integrated security system can be programmed to turn on the home lights when there is a security breach - the best way to deter an intruder.

Scene Programming

Turn On "Scene" With 1 Button. A "Movie" scene where the blinds draw, lights dim, air-conditioner turns on and TV comes on- all at the touch of a button. Or when you are ready for bed and a tap on a "Good Night" button will turn off all the lights, turn off the water heaters and music and draw the curtains.
